

# III Always Be There

Auteur : Roch Voisine

```
[D]      [Dsus2]      [D]      [Dsus2]      [D]

[D]You and I
Have followed the [Bm]trace
Laid by people of [G]faith and pride
With hungry [A]eyes

[D]You and I
Could conquer the [Bm]stars, if we tried
Or simply live [G]by simpler vows
And let the [A]storm go by...

[D]      [A]      [Bm]      [A]      [D]

[D]You and I
Have written the [Bm]book, line by line
And the few things it [G]took to survive
Was your loving [A]heart and mine

[D]Should you go
Remember these [Bm]words, as they show
Just how much I [G]care, don't you know
I'll always be [A]there.                                {I'll always be there}

[D]There when the world and its promises failing          {I'll always be there}
[Bm]There when the frost of its winter is cursing        {I'll always be there}
[D]There when the tears in your eyes, keep on asking [Bm] {I'll always be there}
I'll always [G]be there

[Em]      [C]      [D]      [Dsus2]      [D]

[D]You and I
Will follow the [Bm]trace
Laid by people of [G]faith and pride
With angry [A]eyes gone blind

[D]You and I
Will show them the [Bm]light, we live by
So never ag[G]ain will they try
To keep us [A]apart                                      {I'll always be there}

[D]There when the world and its promises failing          {I'll always be there}
[Bm]There when the frost of its winter is cursing        {I'll always be there}
[G]There when the tears in your eyes
Keep on asking me [A]why                                {asking me why I'll always be there}

[E]There when the world and its promises failing [C#m]

                                                {I'll always be there}
                                                {I'll always be there}

[A]There when the tears in your eyes, keep on asking me [B]why

                                                {asking me why, I'll always be there}

[E]There when the frost of its winter is cursing [C#m]

                                                {I'll always be there}
                                                {I'll always be there}

[A]There when your loving is such you keep burning a[B]live

I'll always be [E]there                                [C#m]                                {I'll always be there}
I'll always be [E]there                                [C#m]                                {I'll always be there}
I'll always be [E]there
END
```
